19. **DOUGLAS, Rev. James.** A Dissertation on the Antiquity of the G(E)arth, Read at the Royal Society, 12th May, 1785. *Printed at the Logographic Press, and Sold by George Nicol, Strand, London. 1785. 4to. in 2s.*

pp. (ii), ii, v-vii, (i) blank, iv, 86, (i) Errata, (i) blank. Title vignette, one text illustration, 8 plates [all aquatinted and printed in sepia, after originals by Douglas]. The words - ANTIQUITY - EARTH - in the title are set in black letter, but the compositor has mistaken the upper case G for the E. The eccentric numbering of the prelims does not indicate anything missing, though some collations appear to refer to a half-title, not present here. Later half russia, now rubbed, rebacked with corners repaired, a little foxing of the plates and adjacent text, good margins, a good copy. £450

*DOUGLAS (1753-1819), divine, antiquary and artist, born in London, placed in business as a young man, in Lancashire, but spent most of his time stuffing birds for the Ashton Lever museum, thence removed to a military college in Flanders where he translated a French text on fortification and gained some reputation. He afterwards entered the Austrian army as a cadet and made the acquaintance of Baron Trenck as a consequence of which association he was sent to England to buy horses for Prince John of Lichtenstein. His acumen and wit were shown by his remarking at the time that as his head, grinning on the gates of Constantinople, would not be a very becoming sight, he declined to return to Austria and enlisted in the British army instead being engaged in fortifying the Chatham lines. Leaving the army, he entered Peterhouse, Cambridge, took holy orders, and served at various ministries in the south-east, ending his days in the vicarage of Kenton, Suffolk. He was a talented artist, both in oils and in engraving and illustrated several of his own works, including the above. An enthusiastic antiquary, he conducted many excavations, during which he discovered a number of fossil remains, stimulating him to consider their geological origin. In addition to his own excavations, Douglas was in contact with other collectors of antiquities - a few of his letters to the son of the Rev. Bryan Faussett demonstrate his interest and industry in preserving important collections. Faussett had explored many tumuli in Kent and had written detailed notes which had remained unpublished. Douglas appears to have acted as an intermediary in securing both collection and notes on behalf of another interested collector but in the end he was not successful. These had to wait another half century before they were bought by Joseph Mayer of Liverpool and Faussett's journal published privately as 'Inventorium Sepulchrale', reprinting a number of Douglas's letters to H. G. Faussett. In this Dissertation, Douglas discusses fossils found by him and lent by others, Sir Joseph Banks, Sir Ashton Lever for example. He also investigated the chemistry of fossil bones compared with recent ones, using a Papin digester. The text gives evidence of his wide reading and enquiring intellect; in the Appendices he discusses the theories of Buffon and Whitehurst. It is a rather obscure book, and Douglas not well known in geological literature, not included in many of the science collections [the Wellcome Catalogue records his *Nenia Britannica*, 1793, but not this one], he is sometimes confused with his earlier namesake, the anatomist.

20. **DUNN, E. J.** Geology of Gold (South Africa, Australia, New Zealand). *Charles Griffin. London. 1929.*

pp. x, 303, (i). 2 frontispiece plates, 81 plates [424 figures]. Original cloth, small mark on front cover, last two plates with a slight marginal tear, paste-downs crinckled and bubbled, frontispieces also slightly crinckled, good copy overall. £150

21. **[DUVAL, Pierre].** A Geographical Dictionary. In which are Described the most Eminent Countreys, Towns, Ports, Seas, Streights, and Rivers in the whole World. Very Useful for the Understanding of all Modern Histories. *Printed by A.M. for Henry Brome at the Gun in St. Paul's Church-yard. London. 1676. Second Edition much Corrected. 12mo.*

pp. (iv), 120 [132], (viii) Catalogue of Books. Folding engraved world map by P[ETER]. STENT. Contemporary calf, wear along the spine edges and corners, joints intact, small hole in the lower margin of the map with an old repair verso, overall a nice copy. £1,200

*WING 2920B; ESTC R41396. It was first issued in 1662 [Bodleian copy only in the UK, and Folger and Yale in the US], with a fifth edition in 1687. The above, second edition, is recorded from 6 locations in the UK, including the British Library and the Bodleian, but there are no copies in the US. The map displays California as a peninsula though the text states that it is an

island near New Mexico; Terra Australis is shown as part of a south polar continent. Peter Stent, the engraver, also produced a large number of portraits during the middle part of the seventeenth century.

- *SAMUEL HIBBERT [1782-1848], antiquary and geologist, born and died in Manchester, his father a linen merchant, his mother the daughter of Robert Ware of Dublin. After his father died in 1815 he studied medicine in Edinburgh and took the degree of M.D. but did not practise. In 1817 he made a voyage to the Shetland Islands and again the following year, publishing his results in 1822. He was a prolific writer in both geology and antiquarian subjects and also gave lecture courses in geology in Manchester. He remained living in Edinburgh until 1830 and then spent two years on the continent studying the volcanic districts of France, Italy and southern Germany. He returned to Edinburgh for three years, and left for his native Manchester in 1835 and in 1837, added the name of his wife's family, Ware, by royal license. He married three times, his third wife being Elizabeth Lefroy [see the inscription above].*
HUNTER & MACALPINE Three Hundred Years of Psychiatry, pp. 760-763 - 'Hibbert concluded that whatever their exciting cause apparitions, that is illusions and hallucinations, resulted from the recall of forgotten memories which being emotionally charged attained a vividness exceeding that of external sensory impressions..... It is surprising to find so early in the nineteenth century psychiatry this basic assumption of an unconscious and its relation to conscious mind....'

**A finely engraved map by GARDNER, with a central image of the ascending ranks of mountains in the global regions of AMERICA - ASIA - AFRICA - EUROPE, the tallest mountain being DHAWALAGIRI in Thibet Himaleh Mnts. [now this region in Nepal] at 26,462 feet. This image is engraved in line and aquatint and hand-coloured, surrounded by a border of text to left and right, at the lower edge, the title within a cartouche flanked by a floral scroll and at the top edge, explanation of the rivers, flanked by an identical floral scroll. The authorities quoted include HUMDOLDT, ULLOA, CLERKE, DE ZACH, JAMIESON & LESLIE. Smith published a number of maps of this kind, the earliest listed in the David Rumsey Collection, for 1816, is much less elaborate and has an entirely different image. It is also smaller, at 49 x 60 cms. The British Library lists an issue with the same title for 1830 and another for [1860] though no images are available for comparison. Another BL issue, for [1847], has a different title - A Comparative Picture, etc. - and is smaller, 52 x 37.5 cms. The above issue is not recorded in the BL [COPAC on-line].*
